# **Key Properties**

# • Excellent physical properties after RT cure

• Free of mercury, MOCA or TDI

#### **Applications**

• For hand-batch processing

## **Processing**

### The processing and material temperature should be between 68-77°F (20-25°C).

IE-3210 may be inhibited by certain silicone rubbers. We recommend that a test sample be prepared to verify compatibility. Contact RAMPF Group Inc. for more information. IE-3210 is also susceptible to moisture contamination. We recommend the casting be completely encapsulated to avoid tackiness of any surface exposed to the air.

Agitate the hardener before use to ensure that the formula is homogeneous.

Packaging		
IE-3210 Quart Kit	4 lbs.	
IE-3210 1 Gal. Kit	16 lbs.	
IE-3210 5 Gal. Kit	80 lbs.	
IE-3210 Drum Kit	900 lbs.	

#### **Storage**

Original containers should be kept tightly sealed and stored at ambient temperatures 59-86°F (15°C to 30°C). If properly stored the products have the shelf-life indicated on the product label.

Partly used containers should always be sealed appropriately and used up as soon as possible.

#### **Handling Precautions**

Good workplace ventilation is to be ensured during processing. At the same time, the employer's liability insurance association's industrial hygiene safety regulations regarding the handling of reaction resins and their hardeners are to be observed. Please take heed of the appropriate safety data sheets.
