Zimmern o. R., February 1, 2016. The 10th Plastics Symposium South from March 3 - 4, 2016, in Rottweil will focus on the latest developments in the plastics market. Representatives of prestigious companies such as RAMPF Production Systems, VTS Kunststoffe, MAN and Sika will be covering a wide range of topics with their presentations and practical demonstrations.

During the symposium, the experts from RAMPF Production Systems, a leading supplier of automation solutions and equipment for processing one-, two-, and multi-component reaction resin systems, will be explaining the further processing and surface finishing of plastic parts through bonding, sealing, foaming, and casting with various kinds of polymers in both theory and practice.

RAMPF Production Systems is inviting visitors to the 10th Plastics Symposium South to take a tour of its plant that will include numerous practical demonstrations.

“Among other things, we’ll be explaining how foamed seals can be applied effectively and cost-efficiently to various plastic parts and how two-component adhesives can ensure secure long-term bonding of dissimilar materials,” says Bernd Faller, Managing Director of RAMPF Production Systems. “Using casting to protect sensitive assemblies will be a further topic,” he adds.

RAMPF Production Systems is organizing the 10th Plastics Symposium South in collaboration with VTS Kunststoffe, an expert on high-performance plastics, technical thermoplastics, and special compounds. Both companies will also be celebrating ten years at the INKOM Südwest industrial and business park in

RAMPF Production Systems GmbH & Co. KG develops and produces low-pressure mixing and dispensing systems for bonding, sealing, foaming, and casting a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.

With its more than 2,700 systems solutions on the market, RAMPF Production Systems, based in Zimmern o.R., Germany, is one of the world's leading suppliers of innovative systems for processing single, dual, and multi-component reactive resin systems.

In addition to the core competence of mixing and dispensing technology, customers are provided with a broad range of automation and conveyor systems for internal logistics, additional assembly and joining technology, as well as logistic and quality assurance solutions. The customer-specific solutions also include the integration of testing and measuring technology into production facilities to safeguard production processes.

This added value enables RAMPF Production Systems to supply its customers with holistic system solutions for their production facilities.

RAMPF Production Systems is a company of the international **RAMPF Group** based in Grafenberg (near Stuttgart)
