Zimmern o. R., May 11, 2017. Innovative production systems with integrated dispensing technology take center stage at the booth of RAMPF Production Systems and its Chinese partner Orient-RAMPF Dosiertechnik at Chinaplas 2017 – Hall 5.1, Booth C34.

RAMPF Production Systems, based in Germany, is one of the world's leading suppliers of innovative systems for processing single, dual, and multi-component reactive resin systems. The product portfolio encompasses more than 2,800 system solutions – from simple handsets to fully automated production systems.

In addition to the core competence of mixing and dispensing technology, RAMPF Production Systems provides customers with a broad range of automation and conveyor systems for internal logistics, additional assembly and joining technology, as well as logistic and quality assurance solutions. The customer-specific solutions also include the integration of testing and measuring technology into production facilities to safeguard production processes.

“This know-how enables us to provide our customers with the best holistic system solutions for their production facilities – because combining cutting-edge process expertise with the best automation concept generates maximum customer benefit”, Bernd Faller, Managing Director of RAMPF Production Systems, points out.

### **Orient-RAMPF Dosiertechnik – strong partner for the Asian markets**

Orient-RAMPF Dosiertechnik has been the partner company of RAMPF Production Systems for the Asian markets since 2007. Orient-RAMPF Dosiertechnik has four manufacturing plants in China as well as a commercial enterprise in Hong Kong.

“The success of RAMPF in Asia is down to the innovative products and solutions as well as the high quality of service and the fast speed of response”, says Yonny Eom, Business Development Manager at

**RAMPF Production Systems GmbH & Co. KG** develops and produces mixing and dispensing systems for bonding, sealing, foaming, and casting a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.

With its more than 2,800 systems solutions on the market, RAMPF Production Systems, based in Zimmern o. R., Germany, is one of the world's leading suppliers of innovative systems for processing single, dual, and multi-component reactive resin systems.

In addition to the core competence of mixing and dispensing technology, customers are provided with a broad range of automation and conveyor systems for internal logistics, additional assembly and joining technology, as well as logistic and quality assurance solutions. The customer-specific solutions also include the integration of testing and measuring technology into production facilities to safeguard production processes.

This added value enables RAMPF Production Systems to supply its customers with holistic system solutions for their production facilities.

RAMPF Production Systems is a company of the international **RAMPF Group** based in Grafenberg, Germany.
