**Grafenberg, April 9, 2017. Successful re-launch: The new website of the international RAMPF Group is now online – and impresses with clarity, modernity, and spectacular visual worlds.**

“The revamped website gives our Group, its products and solutions a fresh, contemporary, and professional look,” says Michael Rampf, CEO of RAMPF Holding. “With its clear structure, the new website also takes into account the fact that our service portfolio has grown significantly in recent years.”

At [www.rampf-gruppe.de](http://www.rampf-gruppe.de) users are provided with precise and attractively presented information. Restructuring content and navigation has created a concept that enables users to quickly find out more about the products and solutions of an individual company and of the RAMPF Group overall.

The website is fully animated and responsive, i.e. perfectly adapted to the features of the relevant device, most notably smartphones and tablets.

### Strong companies are part of a strong group

“The individual company websites each have their own identity while also reflecting their belonging to the RAMPF Group. This underlines the aspect of a ‘strong company that is part of a strong group’”, explains Nicole Luttenberger, Director of Marketing at RAMPF Holding.

Clearly structured, maximum user friendliness, striking images

A separate design has been developed for the careers section, freeing it up to a certain extent and tailoring it to the specific needs of the respective target groups.

“Furthermore, many different applications such as the history timeline and partners & sites also invite users to discover and explore things for themselves”, adds Alexander Meister, Vice President of anders&sehr, a digital communications agency based in Stuttgart, with whom RAMPF designed and implemented the new website.

The RAMPF Group stands for **engineering and chemical solutions** and caters to the economic and ecological needs of industry.

The range of competencies includes:

- > production and recycling of **materials** for modeling, lightweight construction, bonding, and protection;
- > technical **production systems** for precise, dynamic positioning and automation, as well as technologies for complex composite parts production;
- > comprehensive range of **solutions and services**, particularly for innovative customer-specific requirements.

With this know-how, RAMPF helps its customers to achieve profitable and sustainable growth.

The Group secures its presence on the international markets with 800 employees and six core competencies:

- > **RAMPF Machine Systems** based in Wangen (Göppingen), Germany, develops and produces multi-axis positioning and moving systems, trunk machines, and basic machines based on high-precision machine beds and machine bed components made from alternative materials.
- > **RAMPF Production Systems** based in Zimmern o. R., Germany, develops and produces mixing and dispensing systems for bonding, sealing, foaming, and casting a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.
- > **RAMPF Composite Solutions** based in Burlington, Ontario, Canada, is a holistic composites supplier to companies in the aerospace and medical industries. The company offers a complete suite of services including composite part design and engineering, metal-to-composite conversion engineering, and composite manufacturing to very tight tolerances.
- > **RAMPF Eco Solutions** based in Pirmasens, Germany, develops chemical solutions for the manufacture of high-quality alternative polyols from PU and PET waste materials. This expertise is also put to use in the planning and construction of customer-specific facilities for manufacturing polyols.
- > **RAMPF Polymer Solutions** based in Grafenberg, Germany, develops and produces reactive resin systems based on polyurethane, epoxy, and silicone. Its product portfolio includes liquid and thixotropic sealing systems, electro and engineering casting resins, edge and filter casting resins, and adhesives.
- > **RAMPF Tooling Solutions** based in Grafenberg, Germany, develops and produces board and liquid materials for cutting-edge modeling and mold engineering. The range of skills includes made-to-measure services and products such as pastes, large-volume and full-size castings for Close Contour models, and prototyping systems.

RAMPF has subsidiaries in Germany, the U.S., Canada, Japan, and China.

All RAMPF companies are united under a holding company – RAMPF Holding GmbH & Co. KG – based in Grafenberg, Germany.
