Grafenberg, Germany, March 21, 2019. Joint Venture for the Asian markets – The international RAMPF Group has realigned the cooperation with its long-standing partner Orient Dosiertechnik from Korea with the founding of RAMPF Korea Co., Ltd. The new company based in Hwaseong City is developing and producing mixing and dispensing systems specifically for the Asian markets.

Producing in Asia for Asia – The CEOs of RAMPF Holding, Michael Rampf (left) and Matthias Rampf (right), have expanded the long-standing partnership with their Korean partner Yonny Eom with the founding of the joint venture RAMPF Korea.

Within the framework of the new joint venture based in Hwaseong City, mixing and dispensing systems are being developed and produced especially for the Asian markets. For this, RAMPF Korea will predominantly be using dispensing components from German company RAMPF Production Systems, a leading specialist for mixing and dispensing technology and automation solutions.

“Our machines are mostly based on standard mixing and dispensing systems from RAMPF Production Systems. Our 3-axis-dispensing robot, which is offered in the markets in Asia and the Middle East under the type designation DR-CNCe, is based on German technology paired with Korean machine construction expertise”, says Yonny Eom, Managing Director of RAMPF Korea. “This cutting-edge technology sets the stage for our team of experts to develop products that have a unique position in the markets in terms of their quality and level of customization.”

The dispensing robot DR-CNCe was specially developed for the markets in Asia and the Middle East. With its variable X-Y-Z strokes, the DR-CNCe offers highest flexibility for the three-dimensional dispensing of sealants, adhesives, and casting systems. The mixing and dispensing technology forms the basis for highly automated production systems for individual customer projects.

Long-term partnership takes next step

RAMPF and Orient Dosiertechnik, a group of companies with five locations in Korea, China, and Hong Kong, have been working together for more than 15 years. In addition to sales and after-sales services for RAMPF Production Systems, Orient Dosiertechnik sells the polyurethane products produced by RAMPF in China.

“In the past years, a number of automation projects have been carried out as part of this partnership in which our dispensing technology was integrated”, Hartmut Storz, Managing Director of RAMPF Production Systems, explains. “The success of these projects sparked the founding of the joint venture, which is significantly expanding our presence in Asian markets.”

Founding ceremony with 100 guests

RAMPF Korea was officially inaugurated in Hwaseong-City with approximately 100 guests in attendance, amongst others customers and partners, representatives from politics and society, employees, and the management of the German-based holding company.

In his speech, RAMPF Holding CEO Matthias Rampf emphasized the special relationship of the Rampf family with Yonny Eom: “For RAMPF, this joint venture is a further step in the internationalization of our Group and a solid basis for further growth. In addition, it is also proof that true friendship can develop from a partnership if one deals with one another in an open, honest, and fair manner and

The RAMPF Group stands for **engineering and chemical solutions** and caters to the economic and ecological needs of industry.

The range of competencies includes:

- > production and recycling of **materials** for modeling, lightweight construction, bonding, and protection;
- > technical **production systems** for precise, dynamic positioning and automation, as well as technologies for complex composite parts production;
- > comprehensive range of **solutions and services**, particularly for innovative customer-specific requirements.

With this know-how, RAMPF helps its customers to achieve profitable and sustainable growth.

The Group secures its presence on the international markets with more than 880 employees and six core competencies:

- > **RAMPF Machine Systems** based in Wangen (Göppingen), Germany, develops and produces multi-axis positioning and moving systems, trunk machines, and basic machines based on high-precision machine beds and machine bed components made from alternative materials.
- > **RAMPF Production Systems** based in Zimmern o. R., Germany, develops and produces mixing and dispensing systems for bonding, sealing, foaming, and casting a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.
- > **RAMPF Composite Solutions** based in Burlington, Ontario, Canada, is a holistic composites supplier to companies in the aerospace and medical industries. The company offers a complete suite of services including composite part design and engineering, metal-to-composite conversion engineering, and composite manufacturing to very tight tolerances.
- > **RAMPF Eco Solutions** based in Pirmasens, Germany, develops chemical solutions for the manufacture of high-quality alternative polyols from PU and PET waste materials. This expertise is also put to use in the planning and construction of customer-specific facilities for manufacturing polyols.
- > **RAMPF Polymer Solutions** based in Grafenberg, Germany, develops and produces reactive resin systems based on polyurethane, epoxy, and silicone. Its product portfolio includes liquid and thixotropic sealing systems, electro and engineering casting resins, edge and filter casting resins, and adhesives.
- > **RAMPF Tooling Solutions** based in Grafenberg, Germany, develops and produces board and liquid materials for cutting-edge modeling and mold engineering. The range of skills includes made-to-measure services and products such as pastes, large-volume and full-size castings for Close Contour models, and prototyping systems.

RAMPF has subsidiaries in Germany, the U.S., Canada, Japan, and China.

All RAMPF companies are united under a holding company – RAMPF Holding GmbH & Co. KG – based in Grafenberg, Germany.
