Zimmern o. R., June 17, 2019. High-performance team, high-performance technology – Sellados Industriales based in Alicante, Spain, is using dispensing technology from RAMPF Production Systems for contract manufacturing in the automotive, electronics, energy, household, medical technology, and packaging industries.

Ideal solution for complex requirements: Sellados Industriales is using the DR-CNC dispensing robot from RAMPF Production Systems.

“We offer highly efficient, high quality, and flexible contract manufacturing to companies that would like to outsource their production due to operational reasons or due to insufficient volume. Our many years of experience, combined with first-class dispensing technology from RAMPF, ensure that we can quickly find a solution that is perfectly tailored to the customer’s production”, says Javier García Soler, Managing Director of Sellados Industriales.

Since the spring of this year, the company, which also carries out sampling and test series, is using the DR-CNC dispensing robot from RAMPF Production Systems. The DR-CNC is equipped with the highest standards in CNC technology to combine the mixing and dispensing system with maintenance-free CNC linear axis. The result: best interplay of metering process and axis motion sequences.

Variable X-Y-Z strokes enable the three-dimensional dispensing of casting compounds, gaskets, and adhesives. The modular architecture of the DR-CNC allows for simple and full integration into existing production control systems.

The close cooperation between Sellados Industriales and RAMPF Production Systems also covers consulting services, the sale of mixing and dispensing systems for processing one-, two-, and multi-component reactive resin systems as well as project-specific automation concepts.

“The founders of Sellados Industriales, Alberto Gómez and Javier García Soler, have extensive knowledge and experience both in terms of process technology and materials. It’s great that we can now offer even more customer proximity on the Iberian peninsula”, Jesús Arboleja, the responsible Regional Sales Manager at RAMPF Production Systems, points out.

Sellados Industriales was founded in 2018. The company has two production sites, in Alicante and Barcelona, offering highly efficient and flexible contract manufacturing in the fields of gasketing, casting, and bonding. Sellados Industriales has customers in the automotive, electronics, energy technology, household appliance, lighting, and medical technology industries.

RAMPF Production Systems GmbH & Co. KG develops and produces mixing and dispensing systems for sealing, casting, and bonding a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.

With its more than 3,000 systems solutions on the market, RAMPF Production Systems, based in Zimmern o. R., Germany, is one of the world's leading suppliers of innovative systems for processing single, dual, and multi-component reactive resin systems.

In addition to the core competence of mixing and dispensing technology, customers are provided with a broad range of automation and conveyor systems for internal logistics, additional assembly and joining technology, as well as logistic and quality assurance solutions. The customer-specific solutions also include the integration of testing and measuring technology into production facilities to safeguard production processes.

This added value enables RAMPF Production Systems to supply its customers with holistic system solutions for their production facilities.

RAMPF Production Systems is a company of the international **RAMPF Group** based in Grafenberg, Germany.
