Wangen (Göppingen), February 5, 2020. RAMPF Machine Systems has donated the proceeds of its traditional Christmas raffle in the amount of 1,000 euros to the Children's and Youth Hospice Göppingen. The employees of the Malteser Aid Service support children and adolescents with life-threatening or shortening illness as well as their siblings and parents.

“To be companion and contact person for terminally ill children and adolescents, as well as their parents, siblings, and friends, requires enormous courage and strength,” says Thomas Altmann, CEO of RAMPF Machine Systems. “We have great respect for the dedication of the staff of the children's and youth hospice and would like to support them with our donation.”

The Göppingen hospice was founded in 2009. Currently there are 31 volunteers caring for 19 families with a sick child, adolescent, or parent. Furthermore, 17 children and adolescents as well as nine adults are in the facility's bereavement support groups.

Since 2000, the employees of RAMPF Machine Systems from Wangen (Göppingen) have been donating the proceeds of their Christmas raffle to charitable projects in the region.

RAMPF Machine Systems GmbH & Co. KG, based in Wangen (Göppingen), Germany, is the leading supplier and development partner for system solutions, trunk machines, and basic machines, as well as multi-axis positioning and moving systems based on high-precision machine beds and machine bed components made from alternative materials.

The portfolio of high-performance materials includes mineral casting, ultra-high performance concrete (UHPC), natural hard stone, metal foam, and fiber composites. These materials provide a solid basis for ultra-precise and high-performance machine beds and machine bed assemblies.

The full range of services provided by the company includes everything from engineering to production, as well as assembly, system solutions, customer-specific multi-axis positioning and moving systems, and basic machines – from single-piece to series production in customized supply chain solutions.

Using innovative casting, grinding, and lapping processes, as well as high-performance assembly and testing equipment in temperature-controlled production environments, exceptional accuracy of machine bases and basic machines is guaranteed.

RAMPF Machine Systems is a company of the international **RAMPF Group** based in Grafenberg, Germany.
