Press Release

RAMPF – Material & Machine For Battery Applications

Battery Show North America 2021 – Epoxy, silicone, and polyurethane polymers / Dispensing and automation systems

Wixom, MI, USA, September 10, 2021. RAMPF Group, Inc., is presenting high-performance sealing and casting resins as well as dispensing and automation systems at Battery Show North America 2021 in Novi, MI, from September 14 to 16 – Booth 2304.

Epoxy, silicone, and polyurethane polymers

RAMPF Group, Inc. utilizes expertise in epoxy, silicone, and polyurethane polymers for innovative sealing, casting, and thermal management solutions for battery housings, sensors, plugs, relays, and on-board chargers. The reactive polymer systems offer a wide range of mechanical, thermal, and chemical properties, meet the highest quality requirements, and ensure greater safety, control, cost-efficiency, and convenience.

RAMPF sealing systems based on polyurethane and silicone stand for efficient sealing, top quality, and exceptionally easy handling. The fast-curing, low-emission, heat-resistant systems protect battery covers, charging stations, and charging connectors against dust, dirt, moisture, chemical substances, and environmental influences.

RAMPF casting systems based on polyurethane, epoxy, and silicone ensure optimum heat dissipation in batteries and power electronics, while providing long-term protection against chemical substances and environmental influences. This maximizes service life, reliability, and performance. Gap fillers and heat-conductive casting materials guarantee optimized heat management of electrical and electronic components.

Dispensing and automation systems

RAMPF Group, Inc. has comprehensive experience in high-performance production systems for the precision handling and application of polymers.

- > Mixing & dispensing technology high-performance, low-maintenance systems for the ultra-precise dispensing of single-, dual-, and multi-component reactive resin systems; independent of fillers and viscosities.
- > Automation concepts integrated parts transport and heat treatment, assembly and joining technology, logistic and quality assurance solutions, surface activation processes, testing and measuring technology.

Lance Ewert, Division Manager Reactive Polymer Technologies at RAMPF Group, Inc. – "Our material, application technology, and automation experts develop turnkey work cells that improve productivity, quality, cost, and consistency of polymer dispensing, handling, and curing. We also offer a highly dedicated customer service – from product development to market launch."

www.rampf-group.com

RAMPF Group, Inc., based in Wixom, Michigan, is the North American subsidiary of the international RAMPF Group. The product portfolio encompasses:

- > Mixing & dispensing systems for the reliable processing of polymers
- > Two-component polymer (or synthetic) systems based on polyurethane, epoxy, and silicone
- > Modeling and mold engineering materials, in particular for the automotive, marine, and aviation industries
- > Machine bases, machine frames, and other structural components made from mineral casting (polymer concrete)

The international RAMPF Group stands for engineering and chemical solutions and caters to the economic and ecological needs of industry. The Group secures its presence on the international markets with approx. 900 employees and six core competencies:

- > **RAMPF Machine Systems** based in Wangen (Göppingen), Germany, develops and produces multi-axis positioning and moving systems, trunk machines, and basic machines based on high-precision machine beds and machine bed components made from alternative materials.
- > **RAMPF Production Systems** based in Zimmern o. R., Germany, develops and produces mixing and dispensing systems for bonding, sealing, foaming, and casting a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.
- > RAMPF Composite Solutions based in Burlington, Ontario, Canada, is a holistic composites supplier to companies in the aerospace and medical industries. The company offers a complete suite of services including composite part design and engineering, metal-to-composite conversion engineering, and composite manufacturing to very tight tolerances.
- > **RAMPF Eco Solutions** based in Pirmasens, Germany, develops chemical solutions for the manufacture of high-quality alternative polyols from PU and PET waste materials. This expertise is also put to use in the planning and construction of customer-specific facilities for manufacturing polyols.
- > **RAMPF Polymer Solutions** based in Grafenberg, Germany, develops and produces reactive resin systems based on polyurethane, epoxy, and silicone. Its product portfolio includes liquid and thixotropic sealing systems, electro and engineering casting resins, edge and filter casting resins, and adhesives.
- > **RAMPF Tooling Solutions** based in Grafenberg, Germany, develops and produces board and liquid materials for cutting-edge modeling and mold engineering. The range of skills includes made-to-measure services and products such as pastes, large-volume and full-size castings for Close Contour models, and prototyping systems.

RAMPF has subsidiaries in Germany, the U.S., Canada, China, Japan, and Korea.

All RAMPF companies are united under a holding company – **RAMPF Holding GmbH & Co. KG** – based in Grafenberg, Germany.
