**Grafenberg, Germany, January 20, 2021. New management team for RAMPF Polymer Solutions – the specialist for reactive resin systems has appointed Dr. Christian Weber as CEO in charge of technology, while long-time CEO Dr. Klaus Schamel is responsible for sales.**

Christian Weber joined RAMPF Polymer Solutions as Head of Development in April 2018. Holding a PhD in chemistry, he is a proven innovation strategist and an experienced project manager.

“I am looking forward to working with Klaus Schamel to write the next chapter in the RAMPF Polymer Solutions success story. Thanks to his comprehensive market, specialist know-how, and entrepreneurial vision, the company has become a market and innovation leader over the past 13 years. We are very well placed to push ahead with dynamic market developments in our customers’ interests, amongst others in the fields of mobility transformation and sustainability. Our highly qualified team and state-of-the-art R&D infrastructure ensure maximum flexibility

when it comes to developing tailored products and solutions.”

### **New organizational structure with four Business Centers**

In addition to the new appointment, four Business Centers have been established – Adhesives, Electro-casting, Casting Resins & Elastomers, Sealing Systems. This reorganization will take the company’s development of innovative customer solutions to the next level.

Klaus Schamel – “The four Business Centers were identified based on a comprehensive market analysis. Focusing on these will now enable us to use existing resources even more effectively. Optimizing processes will mean far fewer interfaces and faster decisions. One point particularly worth emphasizing is that staff from throughout the company were involved in devising the new structure. This has resulted in a holistic approach that we can put into practice quickly.”

comes.”

Michael Rampf, CEO of the RAMPF Group – “The new organizational structure sets the course for RAMPF Polymer Solutions’ further growth. We would like to thank Klaus Schamel for initiating this process and driving it forward. His services to the company are outstanding. The dual leadership with Christian Weber, a proven expert who has shown himself to be a strong and reliable leader since joining our Group, now ensures a smooth handover when the time

**RAMPF Polymer Solutions GmbH & Co. KG** is a leading developer and manufacturer of reactive resin systems based on polyurethane, epoxy, and silicone. The company also possesses comprehensive expertise in application technology.

The product portfolio of RAMPF Polymer Solutions includes liquid and thixotropic sealing systems, electro and engineering casting resins, edge and filter casting resins, and adhesives.

Research and development are highly prioritized: Based in Grafenberg (near Stuttgart), Germany, the technology pioneer and quality leader has laboratories and facilities for application technology within its spacious Innovation Center. Every day in the RAMPF Innovation Center, new products are developed, existing products are adapted to specific customer requirements, and a huge range of material combinations are tested.

The materials created in the laboratory are tested in the application technology department, where samples are also made for customers to further enhance product quality and reduce the time to series production. Naturally, customers also receive support during the product rollout phase and production process.

RAMPF Polymer Solutions attaches particular importance to renewable raw materials during the initial research phase. Biopolyols are developed in cooperation with sister company RAMPF Eco Solutions. The potential use of recycled polyols in the composition of new products is also closely examined.

RAMPF Polymer Solutions is a company of the international **RAMPF Group** based in Grafenberg, Germany.
