**Wixom, MI, USA, March 7, 2022. RAMPF Group, Inc. is presenting E84 Class A flame retardant modeling pastes and casting systems at TransWorld's Halloween & Attractions Show from March 17 to 20 in St. Louis, MO – Booth 1622.**

“Are you operating or planning to operate a haunted amusement park? Or maybe a spooky attraction, corn maze, farm, pumpkin patch, paintball field, zoo, or aquarium? Are you ready to manufacture amazing backdrops, textured sceneries, creatures, sculptures, and designs? Then you should choose the best – RAKU<sup>®</sup> TOOL flame retardant products!”

– Marianne Harris, Sales Manager at RAMPF Group, Inc.

- > RAKU<sup>®</sup> TOOL modeling pastes EP-2344 / EH-2944 and EP-2346 / EH-2946 are lightweight, easy to process, and adhere securely to most substrates like fiberglass, aluminum, wood, etc. After cure, they are durable, hard as rock, and can be sanded, painted, and machined.
- > RAKU<sup>®</sup> TOOL casting system EC-2406 / EH-2945 is a true multi-tasker as it is lightweight, castable, trowelable, sculptable, carveable, sandable, and paintable. It is also fantastic as a hard coat and does not disfigure or melt any carved foam (EPS and RAMPF styling board included).

Find out more about RAMPF's E84 flame retardant products for monstrous creations at this year's Transworld's Halloween and Attraction Trade Show – Booth 1622!

This stained glass window was manufactured with the flame retardant polyurethane resin Inno-FR<sup>™</sup> FX-8575, the polyurethane resin RapidVac<sup>™</sup> VA-273 for vacuum assisted casting, and the optically clear polyurethane resin InnoClear<sup>™</sup> OC-5080. The window was produced by White Sword Theming, a specialist company for themed environments based in Kissimmee in Osceola County, FL.

**RAMPF Group, Inc.**, based in Wixom, Michigan, is the North American subsidiary of the international RAMPF Group. The product portfolio encompasses:

- > Mixing & dispensing systems for the reliable processing of polymers
- > Two-component polymer systems based on polyurethane, epoxy, and silicone
- > Chemical solutions for the manufacture of high-quality recycled polyols
- > Modeling and mold engineering materials, in particular for the automotive, marine, and aviation industries
- > Machine bases, machine frames, and other structural components made from mineral casting (polymer concrete)

The international RAMPF Group stands for engineering and chemical solutions and caters to the economic and ecological needs of industry. The Group secures its presence on the international markets with approx. 900 employees and six core competencies:

- > **RAMPF Machine Systems** based in Wangen (Göppingen), Germany, develops and produces multi-axis positioning and moving systems, trunk machines, and basic machines based on high-precision machine beds and machine bed components made from alternative materials.
- > **RAMPF Production Systems** based in Zimmern o. R., Germany, develops and produces mixing and dispensing systems for bonding, sealing, foaming, and casting a wide variety of materials. The company also offers a wide range of automation skills relating to all aspects of process engineering.
- > **RAMPF Composite Solutions** based in Burlington, Ontario, Canada, is a holistic composites supplier to companies in the aerospace and medical industries. The company offers a complete suite of services including composite part design and engineering, metal-to-composite conversion engineering, and composite manufacturing to very tight tolerances.
- > **RAMPF Eco Solutions** based in Pirmasens, Germany, develops chemical solutions for the manufacture of high-quality alternative polyols from PU and PET waste materials. This expertise is also put to use in the planning and construction of customer-specific facilities for manufacturing polyols.
- > **RAMPF Polymer Solutions** based in Grafenberg, Germany, develops and produces reactive resin systems based on polyurethane, epoxy, and silicone. Its product portfolio includes liquid and thixotropic sealing systems, electro and engineering casting resins, edge and filter casting resins, and adhesives.
- > **RAMPF Tooling Solutions** based in Grafenberg, Germany, develops and produces board and liquid materials for cutting-edge modeling and mold engineering. The range of skills includes made-to-measure services and products such as pastes, large-volume and full-size castings for Close Contour models, and prototyping systems.

RAMPF has subsidiaries in Germany, the U.S., Canada, China, Japan, and Korea.

All RAMPF companies are united under a holding company – **RAMPF Holding GmbH & Co. KG** – based in Grafenberg, Germany.
