Wangen (Göppingen), Germany, August 8, 2025. Five days, 50 dedicated cyclists, one good cause – For the 23<sup>rd</sup> time, the charity event “Tour de Kreisle” has rolled through the Göppingen district. Taking part for the 15<sup>th</sup> time: RAMPF Machine Systems, the leading expert for machine beds made from mineral casting.

A total of 250 kilometers were covered by participants on e-bikes, visiting nearly every municipality in the Göppingen district. They stopped by town halls, businesses, and institutions to collect donation checks for the "Hospiz im Landkreis Göppingen" [Hospice in the Göppingen District] association.

Despite chilly, damp weather, this year's Tour de Kreisle set a new fundraising record, collecting 57,290 euros – the highest amount in the event's history.

The Tour de Kreisle was initiated in 1998 by Klaus Riegert. At the time, he was a Member of Parliament and combined his campaign tours with fundraising efforts. Since 2008, the event is exclusively supporting the hospice in Faurndau and the construction of a new facility in Geislingen.

Visnja Rauch, Director of Human Resources at RAMPF Machine Systems – “The Tour de Kreisle holds a special place in our hearts. We have been closely connected to this charity event for many years and

**RAMPF Machine Systems GmbH & Co. KG**, based in Wangen (Göppingen), Germany, is the leading supplier and development partner for system solutions, trunk machines, and basic machines, as well as multi-axis positioning and moving systems based on high-precision machine beds and machine bed components made from alternative materials.

The portfolio of high-performance materials includes mineral casting, ultra-high performance concrete (UHPC), natural hard stone, mineral casting Ultralight Flow, and steel composite constructions. These materials provide a solid basis for ultra-precise and high-performance machine beds and machine bed assemblies.

The full range of services provided by the company includes everything from engineering to production, as well as assembly, system solutions, customer-specific multi-axis positioning and moving systems, and basic machines – from single-piece to series production in customized supply chain solutions.

Using innovative casting, grinding, and lapping processes, as well as high-performance assembly and testing equipment in temperature-controlled production environments, exceptional accuracy of machine bases and basic machines is guaranteed.

RAMPF Machine Systems is a company of the international **RAMPF Group** based in Grafenberg, Germany.
