Grafenberg, Germany, January 29, 2026. EcoVadis, one of the world's leading providers of sustainability ratings, has awarded RAMPF Advanced Polymers the Bronze Medal. The recognition underscores the company's commitment and strategic focus in the areas of environment, labor and human rights, ethics, and sustainable procurement.

Key Takeaways

1. RAMPF Advanced Polymers has been awarded the Bronze Medal by EcoVadis, placing the company among the top 35 percent of all companies assessed over the past twelve months.
2. RAMPF Advanced Polymers is a pioneer in chemical recycling, sources renewable electricity, and systematically improves its energy efficiency and environmental performance through a dedicated environmental management system.
3. With more than 150,000 companies evaluated worldwide, EcoVadis is one of the leading platforms for transparent and evidence-based sustainability assessments.

EcoVadis assesses companies based on 21 criteria across four categories. Its methodology is grounded in internationally recognized standards, including the UN Global Compact, International Labour Organi-

zation (ILO) conventions, the Global Reporting Initiative (GRI), and ISO 26000. With more than 150,000 companies assessed worldwide, EcoVadis is one of the leading platforms for transparent and evidence-based sustainability analysis.

Alexander Ege, Chief Technology Officer at RAMPF Advanced Polymers – "This award confirms our strong commitment to sustainable and responsible business practices. We continuously strive to make our products and processes more environmentally friendly – from raw material selection to final delivery. As a pioneer in chemical recycling, we have been setting industry benchmarks for more than three decades. The raw materials recovered through our technologies are used both in our customers' products and our own. In addition, we source energy as sustainably as possible and rely predominantly on renewable electricity at our sites in Grafenberg and Pirmasens. Our environmental management system, which is actively embedded in daily operations, drives continuous improvements in energy efficiency and environmental performance."

Sustainable and responsible corporate conduct has been firmly embedded in the philosophy of the RAMPF Group since its founding more than four decades ago. The implementation of group-wide sustainability objectives is coordinated through a central sustainability management function anchored at the holding company level.

Svenja Hahn, Sustainability Manager at RAMPF Holding – "By systematically identifying and prioritizing key fields of action and translating them into long-term strategies, we are embedding ecological, social, and economic responsibility even more effectively across all companies of the RAMPF Group. In this way, we promote sustainable growth along the entire value chain. We are committed to progressing to the next level in the EcoVadis assessment process."
