

Adjustable pot life Adhesives

RT curing, two component Epoxies

Key Properties

- Rapid to medium setting, adjustable pot life
- 1:1 resin to hardener ratio by weight or volume
- Color indicator for easy mixing
- Transparent bond line after curing
- No special handling or application techniques

Applications

- Small part bonding
- Rapid repair
- Bonding tooling boards
- Bonding metal, glass, wood, most rigid plastics, concrete, stones
- Not recommended for polyolefins, Teflon, Nylon or flexible materials

Processing

The processing and material temperature should be between 20-25°C.

Mix the two components thoroughly in the ratio indicated and apply to both sides of the surface to be bonded.

Packaging

RAKU® TOOL EP-2800	Box of 6 x 1 pound squeeze bottles, 40 pounds in 5 gallon plastic pail
RAKU® TOOL EH-2980	Box of 6 x 1 pound squeeze bottles, 40 pounds in 5 gallon plastic pail
RAKU® TOOL EH-2981	Box of 6 x 1 pound squeeze bottles, 40 pounds in 5 gallon plastic pail
RAKU® TOOL EH-2982	Box of 6 x 1 pound squeeze bottles, 40 pounds in 5 gallon plastic pail

Storage

Original containers should be kept tightly sealed and stored at ambient temperatures (15°C to 30°C). If properly stored the products have the shelf-life indicated on the product label.

Partly used containers should always be sealed appropriately and used up as soon as possible.

Handling Precautions

Good workplace ventilation is to be ensured during processing. At the same time, the employer's liability insurance association's industrial hygiene safety regulations regarding the handling of reaction resins and their hardeners are to be observed. Please take heed of the appropriate safety data sheets.
